PROFILE

Final-year HBO-ICT student (Game Development track) at Amsterdam University of Applied Sciences, seeking a software development graduation internship from February 2027. I develop web applications and games, with experience independently taking projects from concept to implementation. I want to apply game development skills to real-world challenges through serious games that help people learn and make informed decisions.

WORK EXPERIENCE

Web Developer Intern — WebspaceZ, Amsterdam — Sep 2025 – Feb 2026

- Independently developed and delivered a browser-based promotional-image editor, now in use, for independent shop owners without Photoshop experience.
- Integrated an AI image-generation API so users could generate product imagery and incorporate it into promotional designs within the same editor.
- Invited back for a second internship following an earlier placement with the company.

Test Engineer — PowerColor — Oct 2023 – Jun 2024

- Conducted functional and performance testing of graphics hardware using diagnostic and benchmarking tools.
- Identified and documented issues affecting display output, power consumption, thermal behaviour and acoustics.

Web Developer Intern — WebspaceZ, Amsterdam — Oct 2022 – Mar 2023

- Designed and developed client websites, including the Dutch association of acupuncture physicians (Nederlandse Artsen Acupunctuur Vereniging).
- Translated client briefs into page designs and front-end implementations.
